POSTGRESCONF CN 2019

POSTGRESCONF CN 2019

PostgresConf is the world's largest PG conference sequence, and now it has arrived in China. The China PostgreSQL Asslocaiotn, China OSS Promotion Union of the Ministry of Industry and Information Technology and the PostgresConf organization in the United States have successfully held two large-scale domestic PG ecological conferences as of 2019. PostgreSQL Open officially falls into the PostgresConf international conference sequence and officially changed its name to **PostgresConf.CN**, becoming an important regional conference. This will further refine and expand the territory of the PostgresConf global series of conferences, and will also promote the integration of Chinese PG forces into the global PG ecosystem.

SPOTLIGHTS

大会亮点

POSTGRESCONF CN 2019

1 One Full English Tracks Bring more international community leaders

More than a dozen international core group experts, including Oleg Bartunov, Simon Riggs, Joshua.D.Drake, Bruce Momjian, Jim Mlodgenski, Robert Haas, Andrew Gierth, and Michael Paquier, are invited to attend.

2 Top business leaders, Experts open a feast of thought

Top domestic and international experts in the field of infrastructure software and well-known domestic and international business leaders will attend the event, bringing in-depth theme sharing to the participants and opening a feast of ideas in the open source field.

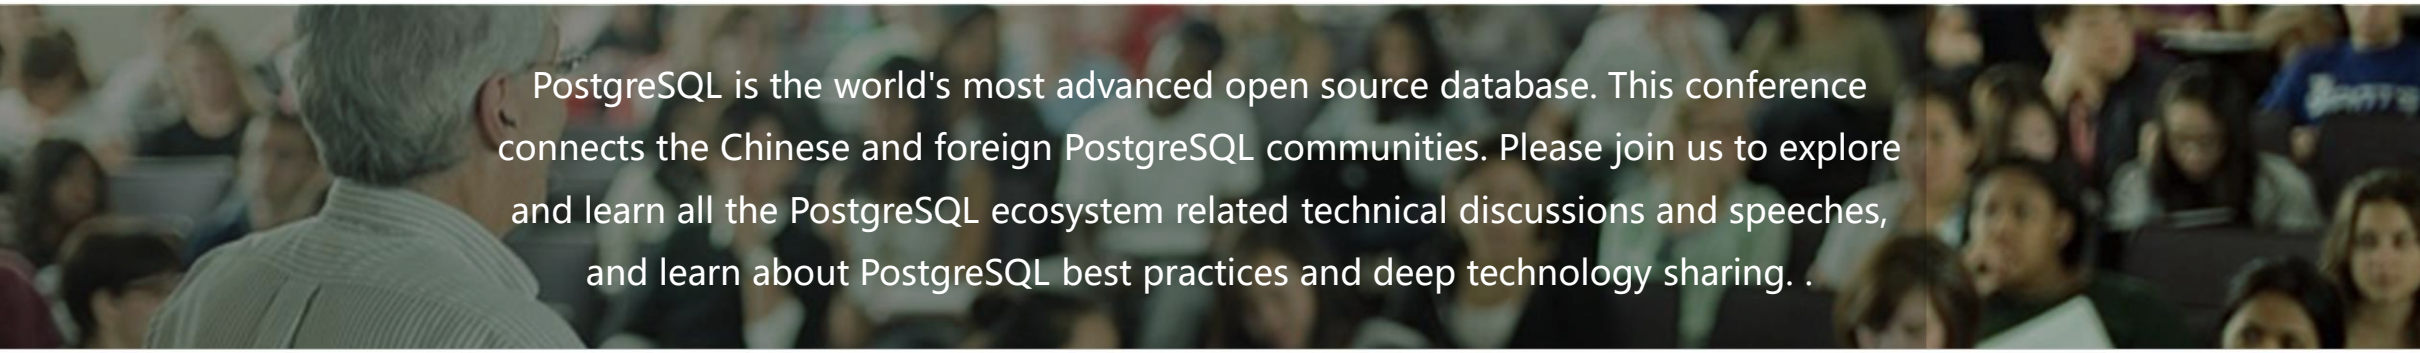
3 Technology Exchange, High-end platform for business negotiations

The open source basic software leading enterprise, the basic software field innovation and entrepreneurial enterprise, the cloud ecological manufacturer, the localized ecological chain enterprise, and the large PG enterprise-level customers gather together, which is a high-value platform for deep technical exchange and business cooperation negotiation.

4 PG China Annual Technology Selections

PostgreSQL is the world's most advanced open source database. At the launch of the PostgresConf conference, China PostgreSQL Association launched PG China's annual technology selection campaign, and together with industry colleagues to look back and summarize the development achievements of PG technology!

POSTGRESCONF CN 2019



YOU WILL GET

- Face-to-face communication and contact with domestic and international PG
- Explore new features, techniques and methods with experts
- Learn how to deploy mission-critical applications on a large scale
- Understand the latest developments and progress in the localization of infrastructure software
- Gain the value of industry synergies and gain potential customers

Participant Value

Developers: Learn more about building applications with PostgreSQL, from basic to advanced application design techniques.
Ops Engineers: Learn about best practices for performance, scale, and health maintenance of PostgreSQL clusters.
DBA: Gain insight into key technologies, performance tuning, and regulatory use of large-scale use of PostgreSQL.
CTO: Gain an in-depth understanding of the advantages of PostgreSQL features, and help to rationalize the decision making of architecture selection and data migration solutions.

THE FUTURE IS COMING

未来已来 [Main forum]

On the basis of the theme of "PG· Insights into the Future" last year, the theme of this year's main forum was "PG·The future is coming", comprehensively reviewing the market performance of PG in recent years, and analyzing the core position of PG in the iterative wave of China's database industry. And how to embrace the trend and embrace the market as the future comes as expected; solve the problems of industrial development and enhance the ability to seize opportunities and develop rapidly.

The PostgresConf main forum is based on the international core developer community and the practice of the pioneers of the domestic community. Speakers share the future with senior technical team leaders, architects, engineering directors, senior DBAs and developers based on hot topics and cutting-edge topics. Trends and digital transformations for best innovation practices.

3. High availability architecture
4. Data migration

ThE PowER oF WE

Create the value of PG industry synergy

5. PG China Ecosystem
6. PG and AI
7. PG Smart Ops
8. GIS

In order to create the synergy value of the PG industry, we will cooperate with many internationally renowned and industry-leading companies such as IBM, Microsoft, Pivotal, EDB, and Highgo. The proposed joint construction includes, but is not limited to, the above sub-forums. It covers the hottest database technologies and topics, covering various industry application scenarios of PG technology.

POSTGRESCONF CN 2019

5 Conversation Models

If you are using PostgreSQL and have an interesting case, we would love to hear from you. We are looking for speakers who can introduce new technologies, ideas, ideas and solutions to engineers and database managers to the PostgreSQL community.

1. 45min Technical Talk
2. 40min Business and user case presentation
3. 20-30min Easy Technology
4. 90-120min Deep technical course training
5. 5min Lightning Talk

1. Technical Talk（45 Min）

Technical seminars are rich in content, including examples, code or demos. They should help listeners understand complex concepts or behaviors, or demonstrate how to use services, software libraries, or tools.

Three very popular technical seminars from PGOPEN last year:
Digal: "PG Real-Time Multidimensional Analysis Practice"
Joshua D.Drake: "The Power of PG Logical Replication"

2. Deep Technical Training （90min）/ or Technical Training （Paid training）

Provide participants with an environment to learn through practice, and let participants know how to do something new.

The most popular in-depth training courses:
Tang Cheng: "PG Technology Insider and Optimization Technology"

The most popular business and user stories:
Wang Yang: "Ping PG Development and Operation Practice"

3. Business and User Case Presentation （40 Min）

Business and use case talks describe a scenario that will resonate with many other attendees and provide a clear set of content that viewers can use to solve similar challenges in their own organization.

4. Easy Technology（20-30 Min）

Discussion of popular technologies, but not limited to the use of PostgreSQL.
Suitable for all PostgreSQL ecological related topics 。

5. Lightning Talks（5 Min）

The Lightning Talks will showcase Postgres features and application scenarios and demonstrate new ways for developers to use Postgres in the enterprise. Most importantly, the Lightning Talks will provide individuals and businesses with unique and innovative ideas with the opportunity to showcase their originality.

演讲者注意事宜

Transportation and accommodation

If your submission is accepted and your employer pays for your transportation and accommodation, they will be eligible to sponsor as a sponsor on the official website (US and China)

Registered spokesperson (speaker)

- The speaker should sign up for the conference (official website registration method)
- The speaker does not pay the conference registration fee
- Speakers should register using the 'PostgresConf Speaker / Conference Speaker Registration Type

Speaker Profile / Biography

Must submit your profile and biographies and personal photos

Please submit all proposals via: meet@postgresqlchina.com.
